

CYBERSECURITY & COMPLIANCE

Comprehensive Solutions to Mitigate Cybersecurity and Compliance Risk

Security is a core tenet of technology and has been a central component of Coretelligent's service offerings since our inception. CoreArmor represents a dedicated, holistic approach to addressing the growing challenges of information security. The platform provides a comprehensive set of threat prevention and detection features, coupled with expert monitoring, analysis, and response. This leads to an unparalleled security management platform that accelerates and simplifies threat detection, incident response, and compliance management for all deployments of cloud, hybrid cloud, and on premise environments. CoreArmor also enables advanced enterprise-class security services for firms of all sizes, across a multitude of business verticals.

Many organizations suffer from "data overload" as it relates to security as they have security data locked into various silos within their organization - endpoint security, firewall logs, VPN logs, and more - all this security data is far less useful without aggregation and correlation to help extract meaningful insights about potential security events occurring across these devices in your organization.

HOW IT WORKS

The CoreArmor platform unifies several essential security technologies into a single cohesive platform, providing clients with expert monitoring and response across the entire environment - from critical infrastructure, servers, and endpoints, to cloud applications and services. Organizations do not need to deploy and manage multiple vendors/products to effectively detect and prioritize the latest threats that put your business at risk.

BENEFITS

24/7 Managed Detection and Response (MDR): Around-the-clock expert monitoring and threat response

Automation and Orchestration: Accelerate reaction time

Reduce Costs: Fully managed security for a fraction of the cost of developing in-house

KEY SERVICES

- Intrusion Detection and Response
- Behavioral Monitoring
- Asset Discovery
- Vulnerability Assessment and Reporting
- Penetration Testing
- Phishing and Awareness Training

How It Works

With CoreArmor, powered by AT&T Cybersecurity's enterprise-class Unified Security Management® (USM) platform, clients receive the combined benefit of:

Cybersecurity

- 24x7x365 intrusion detection monitoring and response from Coretelligent's Security Operations Center (SOC)
- Expert human analysis and review
- Behavioral monitoring and Endpoint Detection & Response (EDR)
- SIEM and log management
- Client portal access for full transparency

Compliance

- Asset discovery
- Vulnerability assessment
- Penetration testing
- Compliance-driven reporting
- Phishing and end-user security awareness training

Service Offerings

Regardless of your firm's size, there's a CoreArmor solution that fits your business' needs and requirements:

	Standard	Advanced	Enterprise
Retention & Response			
Monthly Log Storage	250 GB	500 GB	1000 GB (1 TB)
Real-time event search	30 days	90 days	90 days
Log Data Retention (Offline)	12 months	12 months	12 months
Alarm Review SLA	High Severity 30 Minute SLA Medium Severity 4 Hour SLA Low Severity 24 Hour SLA	High Severity 30 Minute SLA Medium Severity 2 Hour SLA Low Severity 24 Hour SLA	High Severity 30 Minute SLA Medium Severity 2 Hour SLA Low Severity 24 Hour SLA
SOC Team Engagement Pool	6 hours per month	12 hours per month	20 hours per month
