

# PRIVATE CLOUD SOLUTION

Private Cloud Solution for Business Growth

Coretelligent's CoreCloud is a private cloud platform that enables organizations to build and scale on demand without the capital expenditures of maintaining an on-premise IT footprint. The infrastructure as a service (IaaS) solution is fully managed, and organizations benefit with a highly responsive team of technical experts who are available 24/7. CoreCloud is engineered for high availability, seamless transition, rapid deployment, and enhanced security. It is the most secure and cost effective way to reduce the cost of IT ownership and ensure flexibility as business needs evolve and scale with growth.

With CoreCloud's geo-diversified model, customers have the ability to place primary workloads closest to their users leveraging either data center location. They can also scale the primary deployment with additional servers or resources as needed. In addition, CoreCloud can act as a complementary primary or secondary site as part of an organization's existing infrastructure.

To improve or extend an organization's disaster recovery capabilities, secondary server nodes can be placed in the opposite CoreCloud data center for a robust business continuity plan.

## A GEO-DIVERSIFIED MODEL

CoreCloud is powered by a geo-diversified model that ensures the industry's most reliable and secure data management operations with full-time monitoring backed by sophisticated response and remediation protocols.

## HIGH-AVAILABILITY

Coretelligent's East and West Coast data centers are designed for 99.9% uptime for all critical facility services. Additionally, all critical areas are architected with N+1 redundancy to allow for online resiliency should a hardware failure occur.

## KEY SERVICES

- 99.9% uptime
- Geo-diversified data centers are fully managed and highly secure
- Highly scalable server, storage and network architecture
- State-of-the-art virtualized hardware platform
- Reliable and rapid backups with Coretelligent's CoreBDR, which can fully recover data in minutes
- Advanced security and maintenance
- 24/7/365 enterprise monitoring

## **WHY MOVE TO THE CLOUD? BECAUSE IT MAKES GOOD BUSINESS SENSE.**

Today's organizations are under constant pressure to do more with less, and it has never been more important to maximize IT return on investment. Cloud computing offers tremendous opportunity to operate more efficiently and significantly reduce costs.

CoreCloud promises improved security and continued agility and scalability as organizations grow.
