

Coretelligent is a leading provider of comprehensive managed IT, cybersecurity, and cloud management solutions. We deliver a superior experience to our clients whether they need completely outsourced IT solutions or a trusted partner to complement existing IT teams. Coretelligent has real experts working around the clock who place strategy at the core of every engagement. We communicate with our clients on a regular basis to build strong relationships and navigate the complexity of IT, ensuring the best technology solutions.

CoreArmor Overview

CoreArmor represents a dedicated, holistic approach to addressing the growing challenges of information security. The platform provides a comprehensive set of threat prevention and detection features, coupled with expert monitoring, analysis, and response. This leads to an unparalleled security management platform that accelerates and simplifies incidence response and compliance management for all deployments of cloud, hybrid cloud, and on-premises environments. CoreArmor also enables advanced enterprise-class security services for firms of all sizes across a multitude of business verticals.

The CoreArmor Pitch

CoreArmor is a suite of managed cybersecurity services. It provides a single holistic solution to satisfy multiple compliance requirements. It includes 24x7 SOC incident response, a SIEM platform, Penetration Testing, Vulnerability Assessments, End User Security Awareness Training, vCISO Guidance, and more.

CoreArmor Features

- Managed SOC and SIEM
- Vulnerability Assessment & Reporting
- Penetration Testing and Reporting
- End-user Awareness Training
- Intrusion Detection
- Centralized Log Management
- Asset Discovery
- Portal Access
- Compliance Reporting & DDQ Support
- Security Policy Review
- Virtual CISO

CORETELLIGENT FACTS

- Founded in 2006

- Nationally recognized

CoreArmor Benefits

Unique Comprehensive Bundle of Services

A complete cybersecurity strategy requires multiple solutions to address several areas of risk exposure. CoreArmor bundles these solutions into one convenient turnkey offering.

White Glove Service

Our history working with clients in Financial Services and Life Sciences means we understand how to deliver a superlative customer experience.

World-Class Expertise

A vigilant team of dedicated IT security experts located in our US-based 24x7 SOC with deep experience in mitigating threats.

Best-in-Class Technology

CoreArmor includes multiple market leading products to deliver advanced insights and threat protection.

Discovery Questions

- How are you identifying breaches? Would you know if you are being compromised right now?
- When was your last vulnerability assessment? Penetration test?
- Do you have an internal security team? Is that their sole focus?
- Is your business subject to any compliance requirements? If so, how are you handling that today?
- Are you concerned about your ability to keep up with emerging threats such as ransomware?
- How do you secure your cloud-based infrastructure (i.e., AWS, Azure, Office 365, G Suite)?
- How are you training your end-users on cybersecurity awareness?

Cybersecurity Challenges Solved by CoreArmor

Cyberattacks

Attacks by social engineering campaigns, malware, or ransomware are becoming increasingly more sophisticated and even difficult to decipher. Frequent training, new security technologies, and 24/7/365 monitoring mitigates these risks.

Compliance

Organizations following strict regulatory or compliance face additional challenges. A CoreArmor investment ensures compliance is met, and Coretelligent's expert team completes regular penetration tests and vulnerability assessments.

Lack of in-house expertise

Not all organizations have strong, in-house IT and cybersecurity teams capable of performing routine DDQs or complex evaluations. CoreArmor ensures cybersecurity measures are up to standard for all active clients.
