

CORECOMPLY

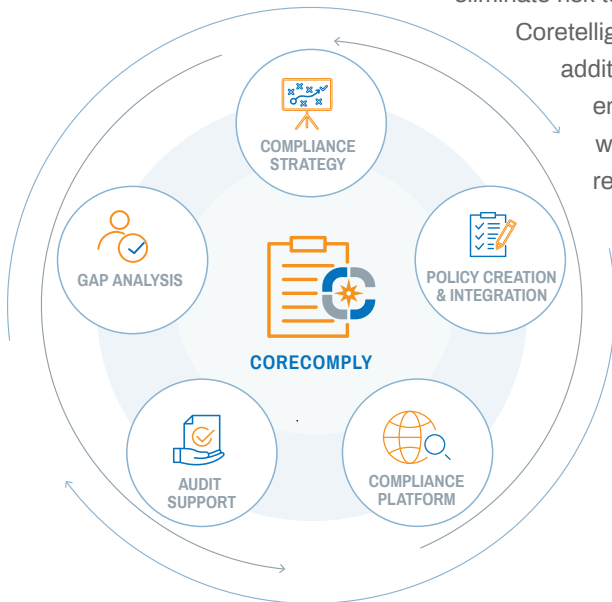

IT Compliance Designed to Meet the Requirements of the Financial Services Sector

YOUR COMPLIANCE CHALLENGE SOLVED

Financial services firms must reevaluate their adherence to compliance in response to the rapidly evolving technology and risk environment. New data privacy regulations, increased audits and enforcement measures, and strengthened 3rd party risk management requirements are driving SMBs to reevaluate their compliance programs. Unfortunately, many organizations lack the resources and expertise to manage these increasing compliance drivers effectively. Therefore, it is critical that SMBs seek a solution to develop a well-designed holistic GRC (governance, risk, compliance) strategy to continuously assess this challenge.

Coretelligent's **CoreComply** solution is a robust compliance platform and advisory service designed for financial services to strengthen and align compliance operations with business operations. Our compliance solution acts as a force multiplier while streamlining the extensive compliance process. Combining a robust technology platform with compliance expertise, our solution enables the discovery and validation of active gaps in your current compliance practice and provides ongoing strategy and guidance on how to best address and close these gaps to manage and eliminate risk to your organization.

Coretelligent also provides additional services that engage and assist with any technical remediation that may be required.
